Author: -webmaster@nasuha.com

Synopsis: This executive summary is for innkeepers and vacation rental Owners to evaluate and present a proposal to VR owners and the board of directors to decide on vrms solution. This solution will help the VR owners to increase revenue and simplify the guest booking process from the frontend to the back office functionalities:-

Vacation Rental Management Software

Web-based guest management and online booking software has never been so easy. Whether you are a property owner with just one property, or a B&B with 10 rooms or a property manager with 100+ properties under management, [lodgix](#) will increase your bookings and simplify your life.

Our Reason for Being

We exist to put out a great product at a reasonable price. The vacation rental software market today is littered with overpriced, junk products developed by folks who don't own or manage vacation rentals. With [lodgix](#) you will get an extremely competitive product without all the feature and pricing bloat in other products. And it helps that we own a ton of vacation rental ourselves!

About us

Our Experience

We own vacation rentals.

We manage vacation rentals.

We understand the market & the guest.

Honesty

We won't promise if we can't deliver.

Our pricing is fair.

Lodgix isn't right for everyone.

Cool Factor

Exhaustive feature

list. Built for simplicity, not complexity.

We lead. Others follow. That's cool.

Flexibility

Comprehensive developer

API. Scalable pricing w/a la carte modules.

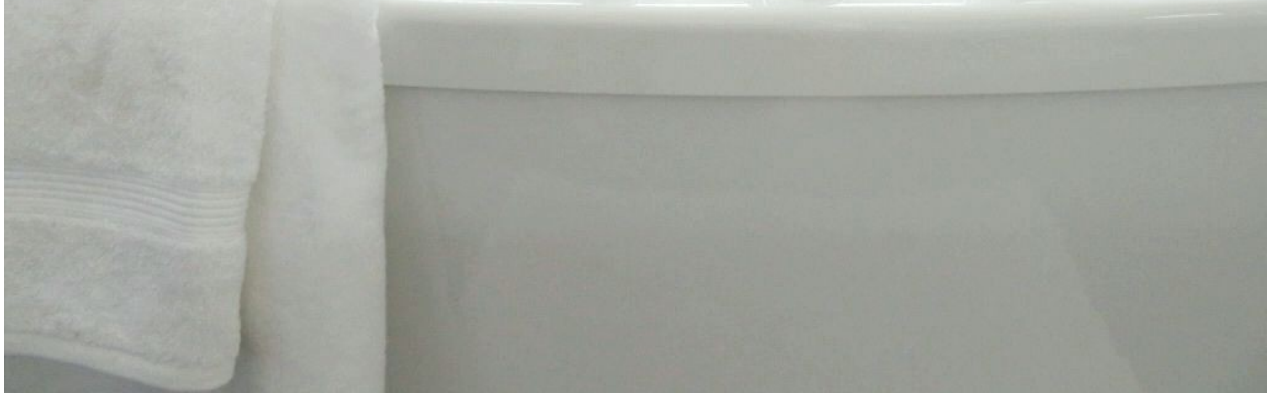

Free 30 day trial, cancel anytime.

What is Lodgix?

Lodgix is a vacation rental system that offers online booking through an easy to navigate panel. It also provided features like communication automation, multiple listing site integrations, email marketing, accidental damage protection, etc.

The system works completely online when it comes to making a reservation. However, there is no restriction on how it is accessed. Users can either use their PC, tablet or even smartphone, the features are available seamlessly between these devices.

One feature that stands out among the crowd is the digital signature option that can be used for rental agreements

Overview of Lodgix Benefits

The interface of both standalone and Wordpress plugin are customizable that can adapt to any existing open source environment. Features like email and text alerts can be triggered and sent to pre-scheduled dates or events such as including arrival and departure dates, invoice status or payment, or day of the month. These alerts can be set according to need which makes it a lot easier to manage user-wise. Lodgix also offers income, occupancy, receivables, and expenses reports. The reports can be exported to other platforms according to the requirements. At the same time, the existing reports can be imported to the solution for the purpose of report analysis and data storage.

- ✓ Automated text alerts
- ✓ Multi-reporting
- ✓ Credit cards
- ✓ Integrations
- ✓ Online booking
- ✓ Calendars

- ✓ Customized emails
- ✓ Email marketing management
- ✓ Customizable user dashboard
- ✓ Invoice generation
- ✓ Permission-based access

Every business has its own characteristics, and can need a specific Hotel Management Software solution that will be adjusted to their business size, type of clients and staff and even individual industry they support. It's not wise to count on finding a perfect app that will work for every company no matter what their history is.

How Much Does Lodgix Cost?
